## CARABINER D ALUMINUM TRIPLE LOCK 25KN KEYLOCK CE EN NBR WITH PULLEY AND EYE MASTER D TRIPLE EYE PULLEY

- ✓ Automatic closing system (triple), Keylock model lock
- ✓ Made of aluminum, type B and with a resistance of 25KN
- ✓ Pulley with 4kN bearing and 25kN eye with 18mm diameter
- ✓ Thickness 11mm, opening 19mm, height 166mm and width 73mm
- ✓ 3 in 1 - carabiner set with pulley and eyelet can be used for various operations
- ✓ In accordance with CE 0321, EN 362, EN 12275, EN 12278 eNBR 15837

# Description

MASTER D TRIPLE EYE PULLEY connector or carabiner, in aluminum, symmetrical D, TASK brand, standards CE 0321, EN 362, EN 12275, EN 12278 and NBR 15837, code TM-0009, type B, weight 184g, thickness 11mm, 19mm opening, 166mm height, 73mm width, automatic closing system with triple security, Keylock model lock, resistance on the major axis of 25kN and on the minor axis of 7kN.

Used for special operations (personal and collective). The system is 3 in 1. Carabiner with 25kN resistance, pulley with sealed bearing with 4kN resistance, compatible with ropes from 5 to 13mm in diameter and eyelet with 25kN resistance and 18mm in diameter.

The carabiner set with pulley and eye is used for various operations. Example of use: lifting equipment, vertical technical rescue operations, counterweight (limited to one person), pulley blocks, stretcher balancing - Easy Balance Technical System - among others.

Pulley compatible with 5 to 13 mm ropes. Pulley diameter: 18mm. Pulley efficiency: 85%.

# Highlights

3 in 1 system

Light and compact at just 184g

Keylock model lock - does not screw

Used for special operations (personal and collective)

Automatic closing with triple security

Built-in eyebolt with 18mm diameter and 25kN resistance

4kN sealed bearing, compatible with 5 to 13mm strings

# Technical Description

MASTER D TRIPLE EYE PULLEY connector or carabiner, in aluminum, symmetrical D, TASK brand, standards CE 0321, EN 362, EN 12275, EN 12278 and NBR 15837, code TM-0009, type B, weight 184g, thickness 11 mm, 19mm opening, 166mm height, 73mm width, automatic closing system with triple security, Keylock model lock, resistance on the major axis of 25kN and on the minor axis of 7kN.

Used for special operations (personal and collective). The system is 3 in 1. Carabiner with 25kN resistance, pulley with sealed bearing with 4kN resistance, compatible with ropes from 5 to 13mm in diameter and eyelet with 25kN resistance and 18mm in diameter.

The carabiner set with pulley and eye is used for various operations. Example of use: lifting equipment, vertical technical rescue operations, counterweight (limited to one person), pulley blocks, stretcher balancing - Easy Balance Technical System - among others.

Pulley compatible with 5 to 13 mm ropes. Pulley diameter: 18mm. Pulley efficiency: 85%.

## Technical advantages

-  Technology with more than 30 years used in security
-  Used for special operations (personal and collective)
-  3-in-1 system - the carabiner, pulley and eyelet set is used for various operations
-  Pulley with 4kN sealed bearing, compatible with ropes from 5 to 13mm in diameter
-  Built-in eyebolt with 18mm diameter and 25kN resistance
-  Light and compact at just 184g
-  Automatic closing system with triple security (3 movements) and Keylock model lock, does not tangle

# Measurements and Materials

Product name:	MASTER D TRIPLE EYE PULLEY
Product code:	TM-0009
Dimensions:	Opening: 19mm   Height: 166mm   Width: 73mm   Thickness: 11mm
Material:	Aluminum
Weight:	184g
Lifespan:	Indefinite duration in the case of normal and appropriate use and when stored under acceptable conditions and inspected according to standards.
Warranty:	1 year against manufacturing defects. NOTE: The equipment is produced with high-tech materials, manufactured in Brazil with 100% quality and safety.

## Applications

The carabiner, pulley and eyelet set is used for various operations. Examples of use: lifting equipment, vertical technical rescue operations, counterweight (limited to one person) pulley blocks, stretcher balancing - Easy Balance Technical System - among others.

Used to quickly join personal and collective equipment. Model D is for universal use, being most used in operations involving installation and anchoring.

## FAQ

### HOW DO I KNOW THE YEAR OF MANUFACTURE/BATCH AND TRACEABILITY NUMBER?

The equipment has tamper-proof laser engraving, with technical information and individual traceability number, being month and year (the last four numbers), following the TASK standard.

### DOES THIS PRODUCT HAVE NATIONAL CERTIFICATION?

Yes. It is designed and manufactured in accordance with NBR 15837.

### WHAT IS THE LIFESPAN OF THE PRODUCT?

The manufacturer informs that the lifespan of the product under normal circumstances and, depending on its proper use and stored in ideal conditions, can reach 10 years, with 5 years after its manufacture being stored, and 5 years when put into operation.

### DOES THIS PRODUCT HAVE CA?

No. CA does not apply to this product.

### DOES THIS PRODUCT HAVE INTERNATIONAL CERTIFICATION?

Yes. It is designed and manufactured in accordance with CE 0321, EN 362, EN 12275 and EN 12278.
