

## TC-0146 (S) | TC-0144 (ML) | TC-0145(XL) SAFETY HARNESS IZ TWO®

- ✓ Straps with padded padding on the shoulders, legs and torso, ensuring extra comfort, lightness and safety
- ✓ INOX buckles with exclusive AC® system, double cylindrical bar buckle with stainless steel angled crown
- ✓ Double safety in case of falls, in addition to ergonomics and comfort for work
- ✓ 3 yellow material holders (contrasting color) with a load capacity of 10kg each
- ✓ Exclusive DOUBLE LINK double-ring textile coupling system, 3 times lighter than metal points
- ✓ 2 material holders on the shoulders to fit the MGO connectors of the fall prevention system
- ✓ Noble metal material (stainless steel and aluminum), satisfied buyers due to corrosion resistance - 100%
- ✓ Innovative size system: S, ML and XL, for people up to 150kg

# Description

The IZ TWO® is a parachute-type safety harness with 2 connection points and 2 rescue points on the shoulders, ideal for working at heights and in confined spaces with dorsal and chest connection (PFAS), including 2 DOUBLE LINK® textile fall arrest points.

With 3 structured yellow material ports with a load capacity of 10kg each and 2 material ports on the shoulders for fitting the MGO connectors of the fall arrest system.

With straps with padded filling on the shoulders, legs and torso, ensuring extra comfort, lightness and safety. The strap with padded filling system is a TASK patent. Exclusive strap with padded filling on the chest offers double safety in case of falls, in addition to ergonomics and comfort for work.

Its straps are made of material that retards flames when in contact with the harness, ideal for electricians, firefighters and professionals who are subject to this risk.

It has stainless steel buckles – exclusive AC® system. It is patented and has a double cylindrical bar buckle with an angled stainless steel crown. Exclusive DOUBLE LINK® textile fastening system with a double ring and more resistant than traditional metal points. DOUBLE LINK® weighs only 25 grams, 3 times lighter than metal points.

Resistant to 50,000 cycles of use (approximately 15 years of intense use). The DOUBLE LINK® textile fastening point also reduces wear on connectors, as it does not have metal contact. Innovative size system: S, ML and XL.

# Highlights

3 sizes: S, M, L, XL

- 1** Tapes with filling system, TASK patent
- 2** DOUBLE LINK® textile coupling system
- 3** Noble metal material (stainless steel and aluminum)
- 4** 4 anchor points, extremely light and corrosion resistant
- 5** 3 yellow material holders, capacity of 10kg each
- 6** 2 material holders on the shoulders for fitting MGO connectors
- 7** QR code for reading technical information
- 8** (Callout to the full harness image)

# Technical Description

The IZ TWO® is a parachute-type safety harness with 2 connection points and 2 rescue points on the shoulders, ideal for working at heights and in confined spaces with dorsal and chest connection (PFAS), including 2 DOUBLE LINK® textile fall arrest points.

With 3 structured yellow material ports with a load capacity of 10kg each and 2 material ports on the shoulders for fitting the MGO connectors of the fall arrest system.

With straps with padded filling on the shoulders, legs and torso, ensuring extra comfort, lightness and safety. The strap with padded filling system is a TASK patent. Exclusive strap with padded filling on the chest offers double safety in case of falls, in addition to ergonomics and comfort for work.

Its straps are made of material that retards flames when in contact with the harness, ideal for electricians, firefighters and professionals who are subject to this risk.

It has stainless steel buckles – exclusive AC® system. It is patented and has a double cylindrical bar buckle with an angled stainless steel crown. Exclusive DOUBLE LINK® textile fastening system with a double ring and more resistant than traditional metal points. DOUBLE LINK® weighs only 25 grams, 3 times lighter than metal points.

Resistant to 50,000 cycles of use (approximately 15 years of intense use). The DOUBLE LINK® textile fastening point also reduces wear on connectors, as it does not have metal contact. Innovative size system: S, ML and XL.

## Technical Advantages

-  Straps with padded padding on the shoulders, legs and torso, ensuring extra comfort, lightness and safety
-  Exclusive strap with padded padding on the chest, offering double safety in case of falls and ergonomics and comfort for work
-  DOUBLE LINK® textile coupling point resistant to 10,000 cycles of use (10 years of intense use)
-  DOUBLE LINK® reduces carabiner wear, does not present metal-to-metal contact
-  Developed with noble metallic material (stainless steel and aluminum), satisfied buyers due to its corrosion resistance - 100%
-  Does not lose tension in adjusting to the body even when the person walks
-  Exclusive patented AC® system, double cylindrical bar buckle with stainless steel angled crown on both sides
-  3 yellow structured material holders, facilitating the handling of equipment
-  3 sizes and with an innovative identification system - TASK methodology, for people weighing up to 150kg
-  2 material holders on the shoulders, to fit the MGO connectors of the fall prevention system
-  Made of 100% polyester fibers
-  For people up to 150kg

## FAQ

### IN WHAT TYPES OF ACTIVITIES CAN I USE IZ TWO®?

The harness is specially developed for vertical operations as well as work at height and in confined spaces.

### HOW DO I KNOW THE YEAR OF MANUFACTURE/BATCH AND THE TRACEABILITY NUMBER?

The harness' traceability label follows the TASK standard: individual number, month and year (the last four numbers).

### WHERE IS THE QR CODE?

The QR code for the IZ TWO® harness is located together with the traceability code on the back of the torso adjustment strap.

### WHAT ARE THE PATENTS ON THE HARNESS?

Tapes with filling system is a TASK patent. Exclusive DOUBLE LINK® double-ring textile hooking system. STAINLESS STEEL buckles with exclusive AC® systems.

### WHAT ARE THE USER'S SIZES AND WEIGHTS?

Innovative size system: S, ML and XL. For people up to 150kg.

### HOW MANY AND WHICH ARE THE ADJUSTMENT POINTS ON THE HARNESS?

The harness has 4 stainless steel buckles for adjusting the waist (2) and torso (2).

### IF I FALL WITH THE HARNESS, WHAT SHOULD I DO?

According to NR 35 - 35.5.2.3 PPE, accessories and anchoring systems that present defects, degradation, deformations or suffer impacts from falls must be rendered unusable and discarded, except when their restoration is provided for in national technical standards or, in their absence, international standards.

### WHERE IS THE INMETRO LABEL?

The INMETRO label on the IZ TWO® is located on the back, on the torso adjustment strap.

### DOES THIS HARNESS HAVE A CA?

Yes. The harness has CA 48236.

### HOW LONG DOES THE HARNESS LAST?

The IZ line is 3 times more durable than a normal harness, produced with noble materials such as steel buckles that guarantee this durability and 100% satisfied customers.

### WHAT TYPES OF CONNECTIONS DOES THE HARNESS OFFER?

The harness has 4 anchor points, is extremely light and corrosion resistant – 100%, with 2 connection points and 2 rescue points on the shoulders.

### WHAT IS THE USEFUL LIFE OF THE HARNESS?

The manufacturer informs that the harness' lifespan under normal circumstances and depending on its proper use and storage in ideal conditions can reach 10 years, 5 years after its manufacture when kept in storage, and 5 years when put into operation.

## HOW TO MEASURE YOUR HARNESS SIZE?

The harness size should be checked as follows:

| LOCAL     | MINIMUM-MAXIMUM | METHOD                                                                                                                           |
|-----------|-----------------|----------------------------------------------------------------------------------------------------------------------------------|
| Waist     | Minimum         | Pull the tape so that it closes the waist diameter. the buckle tip must remain 3cm from the beginning of the ventral connection. |
|           | Maximum         | Pull the tape to open the waist diameter. The tip of the buckle must remain 1cm from the start of the double bar.                |
| Suspender | Minimum<br>--   | The adjustment must be made so that the dorsal ring is centered between the armpits and shoulders.                               |
